

2-VALVE BLOCK AND BLEED VALVE

Block and bleed valves allow pressure isolation, venting, and instrument removal without shutting down the system. The 1/4" NPT port allows easy calibration checks, venting to atmosphere, or capturing process media with direct connection to piping.

FEATURES / BENEFITS

- Complies with MSS SP-99 and MSS SP-132 Standards Where Applicable
- Rolled Threads for Strength, Durability, and Ease of Use
- Bleed Plug Standard
- 316SS Body Option Complies with NACE MR0175
- Leak Tested Before Shipping
- Available Factory-Installed on Reotemp Instruments

SPECIFICATIONS

| | |
|----------------------------|--|
| Body Material | 316SS, Carbon Steel, Monel, Hastelloy C276, Duplex 2205, Super Duplex 2507 |
| Max Pressure Rating | 10,000 psi |
| Min/Max Temperature Rating | -67°F to 1,000°F |
| Seats Available | Hard, POM, PEEK, PCTFE |
| Connections Available | 1/4"NPT, 1/2"NPT, 3/4"MNPT |
| Bleed Connection | 1/4"FNPT |

¹Available in hard seat only.

²Increases max pressure to 10,000 psi for PTFE and to 7,200 for Graphite. Available in hard seat only.

³POM is comparable to Delrin.

⁴PCTFE is equivalent to Kel-F.

⁵Max temperature is 392°F at 1,305 psi. Max pressure is 6,000psi at 140°F.

⁶Graphite packing with S body only.

⁷MT is not available with carbon steel, FKM, or PEEK. LT requires a hard seat or PCTFE soft seat, PTFE stem seal, and S body.

Note: Not all combinations in the above table are possible. Conversely, if a combination is desired but not seen, ask your Reotemp Sales Representative. Additional configurations and options are available upon request.

Instrument and Valve Assemblies

Why order a Reotemp Instrument and Valve Assembly?

- Easy out-of-the-box installation
- All potential leak paths are factory tested (1,000 psi max)
- High quality sealant for each threaded connection
- Saves time in the field
- Fully customizable to include diaphragm seals, monoflanges, swivel adapters, etc.

VALVES

Why does every pressure instrument need the right valve?

- For easier maintenance and repair
- For quicker calibration checks
- For more control when putting an instrument into service
- For capturing process media before it vents to the atmosphere
